Report ID: 36529fb1

Executive Security Report

Executive Summary

Total vulnerabilities: 0

Highrisk issues: 0 and no immediate businessimpacting security findings were detected in the scanned code

Overall risk level: Low

Technical Details

Finding 1 No actionable security findings detected in source code scan

Severity: Low

AI Explanation: Static analysis did not identify any confirmed security issues in the provided codebase during this review.

Fix Suggestion: Keep dependency and code scanning in CI/CD, and retest after any major code changes.

Finding 2 Dependency scan could not be completed

Severity: Low

AI Explanation: The dependency scanner could not run because no requirements.txt file was found in the project, so package risk could not be assessed.

Fix Suggestion: Add or locate the Python dependency manifest, then rerun dependency scanning.

Tool outcomes (Bandit, Sonar, Safety, ZAP):

Bandit: Succeeded — scanned /workspace/uploads/dc0954438e12 and found no issues.

Sonar: Succeeded — returned 0 issues.

Safety: Failed — no requirements.txt found in project.

ZAP: Not run — no URL target was provided.

Tool Failures

Safety scan could not proceed because the project did not contain a requirements.txt file.
