Report ID: f39fc72e

Executive Security Report

Executive Summary

Total vulnerabilities: 0

Highrisk issues: 0 and no immediate business impact identified from the available static analysis

Overall risk level: Low

Technical Details

Finding 1 No static code vulnerabilities detected

Severity: Low

AI Explanation: Bandit found no Python security issues in the scanned file, and Sonar returned no code issues.

Fix Suggestion: Keep security checks in CI/CD and rescan after any code changes.

Finding 2 Dependency scan could not be completed

Severity: Medium

AI Explanation: Safety could not run because the project does not contain a requirements.txt, so dependency risk could not be assessed.

Fix Suggestion: Add or locate the dependency manifest used by the project, then rerun dependency scanning.

Tool outcomes (Bandit, Sonar, Safety, ZAP): Succeeded or Failed with reasons.

Bandit: Succeeded — no findings in /workspace/uploads/141d74142674/server.py

Sonar: Succeeded — no issues reported

Safety: Failed — No requirements.txt found in project

ZAP: Not run — no HTTP/HTTPS target was provided

Tool Failures

Safety scan could not evaluate dependencies because the project folder did not include requirements.txt
